

DEFI KINGDOMS

DeFi Kingdoms, the number one project on the Harmony Blockchain, is excited to announce their first cross-chain expansion to Avalanche with the launch of a new realm, DeFi Kingdoms: Crystalvale, alongside a new token: CRYSTAL!

Avalanche boasts near-instant transaction finality, a throughput of over 4,500 transactions per second, and low fees, making it the perfect platform for GameFi applications.

DeFi Kingdoms is a Play to Earn MMORPG which is built upon a strong DeFi protocol, and which features rare and unique NFTs with built in utility, to create an immersive and beautiful online world in the incredibly nostalgic form of fantasy pixel art.

DeFi Kingdoms aims to make Decentralized Finance (DeFi) safe and accessible to newcomers. In the first step of the DeFi Kingdoms Universe expansion strategy, Crystalvale will make things even more accessible by bringing gameplay to the Avalanche ecosystem.

DEFI KINGDOMS

Gameplay

All of the core features of DeFi Kingdoms will be available natively in Crystalvale. Gameplay in DeFi Kingdoms is centered around Hero NFTs. Hero NFTs are playable characters that you can level up and earn CRYSTALS with! As your heroes are assigned to go on quests, they'll earn XP, increase their stats, find and craft rare items, participate in PVE and PVP Tournaments, and more!

This is a play-to-earn model that is still in development with a lot of fun features in the works. The roadmap is packed with exciting features like customizable land and multiplayer combat. DeFi Kingdoms: Crystalvale will feature a limited series of Gen0 Hero NFT's that will introduce new genes and classes unique to Crystalvale, as well as unique quests, resources, buildings, NPCs, equipment, and pets.

Tokenomics

Each realm of DefiKingdoms will feature a power token which can be farmed in the Gardens, earned as rewards from quests, be unlocked via mining, and used to pay for in-game transactions including summoning, buying, selling, and renting new Hero NFT's.

JEWEL is the native token of DeFi Kingdoms: Serendale on Harmony, and will play a very pivotal role in acquiring CRYSTAL, the native token for Crystalvale. The expansion strategy is set up to reward existing JEWEL holders with CRYSTAL airdrops, as well as unique items, lands, and more, once the new realm is opened up. Notably, the primary way to acquire CRYSTAL at launch will be via single-staking bridged JEWEL tokens in the Ice Gardens.

Existing players will enjoy newfound utility for their JEWEL tokens and Hero NFTs with the Crystalvale expansion, enabling them to bridge their assets and explore new lands, run new quests, and enjoy new gardening and mining opportunities.

New Avalanche players will be able to get in early and can begin collecting JEWELS now with new liquidity pools on Trader Joe and Pangolin.

DEFI KINGDOMS

- Earn CRYSTAL through single staking of JEWEL
- DEX will have incentivized pools in the Ice Gardens that emit CRYSTAL as a reward
- Rewards for staking will be split between unlocked and locked CRYSTAL with an initially high emission rate that declines each epoch
- The percentage unlocked each week will increase by 2%, until the unlocked rate reaches 100%, at which point the locked CRYSTAL will begin unlocking linearly over the course of the next year
- CRYSTAL is used for summons in the new realm Portal and for purchasing & hiring Heroes in the new realm Tavern, purchasing land, entering tournaments, and more
- CRYSTAL can be staked in the Bank to earn a share of the in-game transactions

New Artwork & Design

DeFi Kingdoms: Crystalvale will feature a new map with unique NPCs, made up of familiar elements specifically designed around the wintery theme of the Crystalvale.

Come join the fast growing DeFi Kingdoms community and explore the world by adventuring and building the kingdom through cross chain game play in the new realm of DeFi Kingdoms: Crystalvale.
